

# Blackboard

## How can I allow "outsiders" to have a look at my course module?

Guest Access is not enabled for Blackboard - if you wish an external user to have access to a module please please log a call for Blackboard via ISS Service Desk requesting that an external user account be created (full name and email address required) together with the reason (eg external examiner), the modules they need access to and the level of access needed (instructor/edit or student/view)

Unique solution ID: #1790
