

Blackboard

What is the “Edit Mode” link in the top right hand corner?

The ‘Edit Mode’ link allows you to quickly toggle between Edit mode on and edit mode off. With Edit mode on, you are able to view, add and edit content within your module, including content that is currently unavailable.

When Edit mode is off, you won't be able to see any content that is unavailable, nor will you be able to edit content. This is the view that is most similar to what your students will see (though they won't see the Control Panel).

Edit mode remembers your last setting (ie. on or off) and sets this the next time you login. Please note that this is only available if you are an instructor on a module or a leader on an organisation
