Assessing your Wiki

It is possible to grade the wikis, and have the results appear in the Grade Centre. Details of how to enable your wiki for assessment can be found in the guide "Creating a New wiki".

Ensure that you are in the relevant wiki
Click on the Settings Button and select Assessments .

The resulting screen will give you a basic summary of entries, views and comments.

A slightly more detailed list is displayed underneath, showing individual contributors and a breakdown of their entries.

Note only those who have accessed the wiki will appear in this list:

To grade participation, click on the student that you wish to grade. A box will appear asking you to grade this participant. Click on the Edit link to display the box that allows you to give that student a mark.

It is possible to give feedback and provide grading notes, similar to the way you do in the Grade Centre. When you have entered any required information, click on the Submit button.

Unique solution ID: #1952
